

Call For Papers: AMN

INTRODUCTION

As our extractive industry expands on one end and contracts on the other, experienced industry professionals pour in and pour out in no time. What has been your challenge in the field as an extractive industry professional (geologist, mining engineer, metallurgist, logistics personnel, surveyor, Geotech, IT Manager, etc.) and how have you solved it (them)?

The extractive industry is complex and varied with a plethora of daily on-the-job challenges. Many a time, Project Leads are able to engineer and develop or come up with unique solutions to these challenges and that is the end. To make your contributions significant, AMN is looking forward to documenting such personal experiences and efforts that bridge the old technique and new ones in mining practices for the growth of our industry. Selected stories would be published in the Network's periodicals; what a great and an exclusive opportunity to have your innocuous and unique historical industry experiences be known to the world and to the next generation?

So, as an extractive industry professional, have you experienced any on-the-job or camp challenges, and proceeded to provide unique solution(s) you would like to share?

AREAS OF INTERESTS OR TARGET.

Stories from the full extractive industry value chain, e.g. Safety issues, geology (from greenfields to brown fields), Mining (Surface and Underground), Supply (Logistics), Financial (Fiscal or otherwise) and any of the numerous allied fields influencing our industry etc. are welcomed.

Length of submission: Not more than 2000 words, in word format or cut and paste online via this [link](#).

Deadline. March 10, 2020, 11.59pm GMT

Contact: For further enquiries on this *Call for Papers*, please kindly send an email to info@accramining.net or call +233(0) 264 222595.

Be part of an AMN Technical Mining Journal

The Accra Mining Network (AMN) is the largest amorphous extractive industry platform in Ghana, where industry professionals meet, learn and earn in an informal environment.

WHAT YOU NEED TO DO

Available options:

1. Click [here](#) and fill an online form, OR
2. Try answering the following guide questions and send via email to Harriet on harriet@accramining.net in a word document format.
 - i. On the scale of one to ten, how responsive are you to challenges in the Mining sector with relation to policy and operation?
 - ii. Which aspect of Industry have you worked in and/or have an interest in?
 - iii. Which company do you work with/for?
 - iv. What is your role in the mineral and extractive industry?
 - v. Location: Where do you work? Country/Company.
 - vi. What challenges have you faced at the work place (past/present)?
 - vii. Was there a reason the challenge could not be resolved by you and/your department or were there some inherent obstacles by way of structuring, lack of capacity, etc?
 - viii. How did you come about the solution for this challenge?
 - ix. Is your solution still being used or has it been upgraded? By you or someone else?
 - x. What is your concluding advice or message to the Mining Industry from this experience?

NB: When using option 2 above, please remember to add your **Full Name, email address(es), telephone contact(s), a brief biography about your professional life and state whether you are a member of the Accra Mining Network or not.**
